

## Exercise Set 01: Introduction To Java

1.

```
// The "Testing" class.  
import java.awt.*;  
  
public class Testing  
{  
    public static void main (String[] args)  
    {  
        /* output line */  
        System.out.println("Testing");  
    } // main method  
} // Testing class
```

Consider the code above,

a. **What is the name of the class?**

The class is Testing (uppercase T)

b. **What is the name of the source code file?**

Testing.java

c. **What is the name of the class file?**

Testing.class (will have the same class name, and will be the same as the source code file w/o .java and instead the .class)

d. **Mark the beginning and the end of the class.**

e. **Mark the beginning and the end of the main method.**

f. **Mark the line of comment.**

g. **What is the name of the packages that are imported?**

The package being imported is java.awt

h. **What does the program do?**

Print the line "Testing" in the console window, and starts a new line.

2. **Output1.java** Write a program that outputs your name and your address on separate lines.
